

ALB Host Wood Disposal Yard
Permanent Location

0 Dr. Paul Ware Dr. Boylston, MA 01505

Hours of operation : Monday thru Friday

8:00am – 3:00pm

Wood from the twelve host genera **which cannot be chipped** will be accepted. Brush and chips will be rejected. Companies with a valid Compliance Agreement (CA) may transport regulated material directly to the disposal site where they will be examined and recorded by the site attendant. **The address of the source of the regulated material must be provided at this time. Vehicles used for disposal must display a valid program decal.**

STUMP DISPOSAL PROCEDURES

Stumps of host trees cannot be taken directly to the site; you are required to obtain a disposal certificate prior to transport. Please contact the ALB Program office **BEFORE** the stumps are removed from the ground. A Program representative will examine and mark the host stumps at the removal site and issue a certificate which must accompany the stumps to the disposal site.

Once the stumps are pulled, please remove excess soil, rocks and other site debris before transporting the stumps to the disposal facility. **Stumps of non-host trees, those with no accompanying certificate, and those with excess site debris will be rejected.**

Please feel free to call the Program office if you have any questions.
