

## Conflict of Interest Training Managing Flash

### Firefox

Firefox will show a lego brick style icon to the left of the address. Click on that.

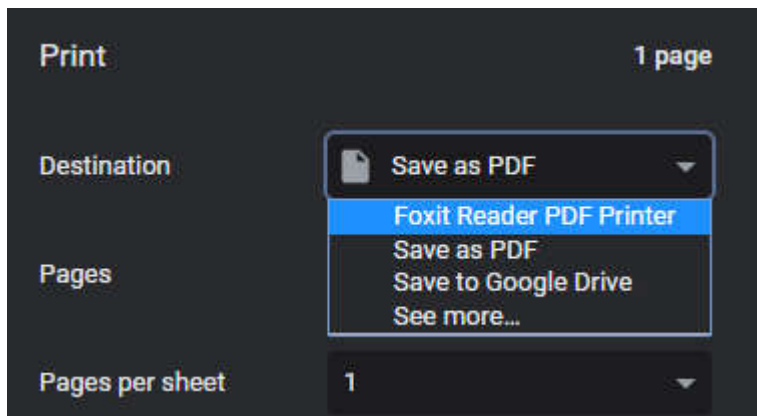

This will bring up a small window where you can allow Flash to run. Click Allow.

If the Flash player doesn't run, you may need to refresh the site.

### Printing

Once finished and it is time to print the certificate, you should select either Save as PDF (chrome) or Foxit Reader PDF Printer. This will allow you to save the certificate as a PDF file. You can then open the PDF file to make sure the information is correct and print it.

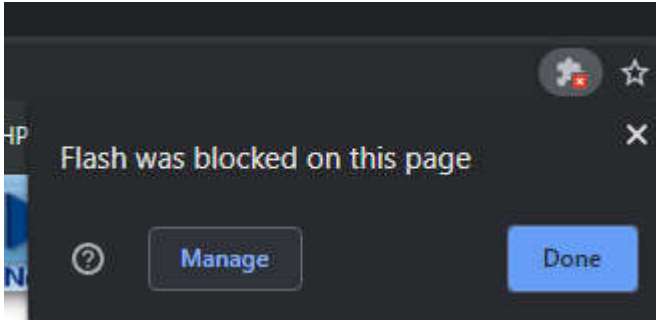

## Chrome

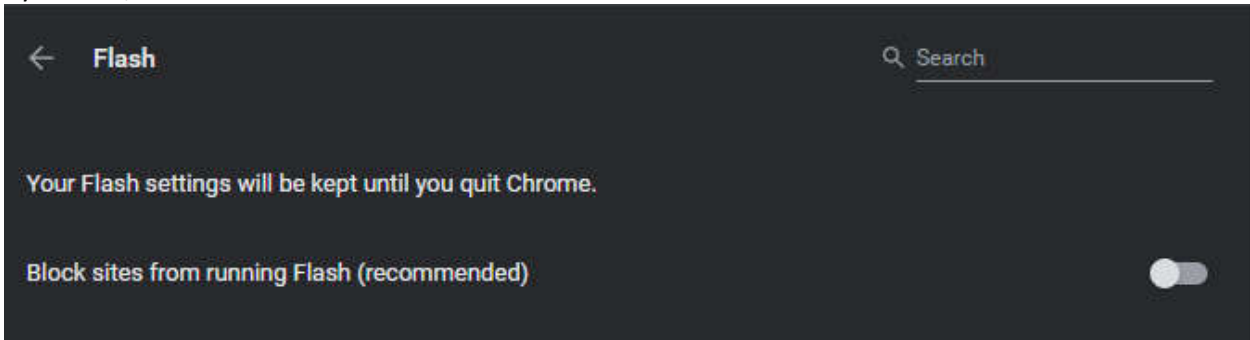

Chrome will show a puzzle piece to the right of the address. Click on that.

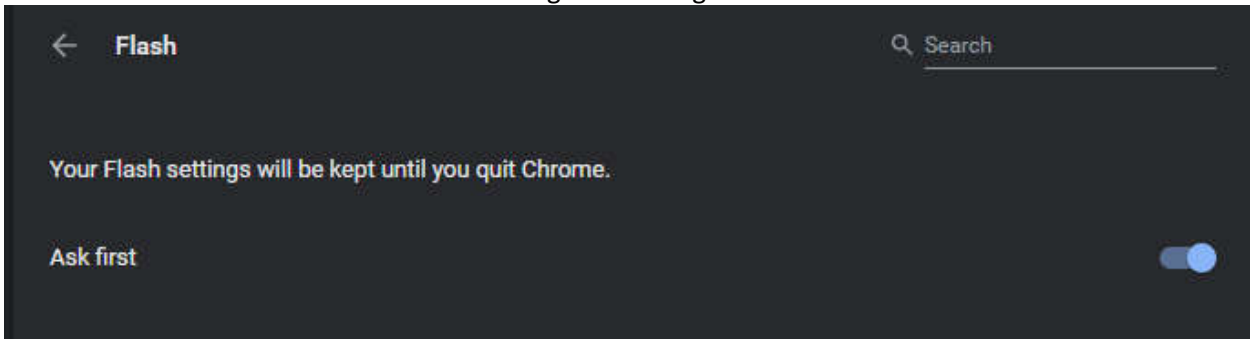

This will allow you to manage Flash settings, click on Manage.

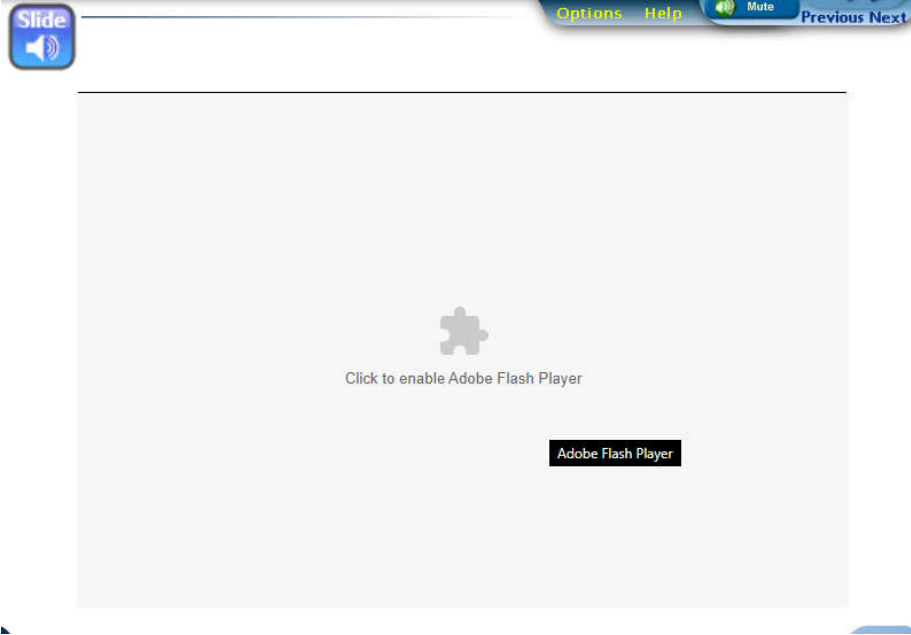

By default, Flash is set to be blocked. Click on the slider.

You should see the information about blocking Flash change to Ask first.

Go back to the page and you should see the following, you may need to refresh the page first. Click on the puzzle piece on the screen.

This brings up another menu, click on Allow to run Flash.
